DISPLAYS **N** FRAMES

DISPLAYS **N** FRAMES

Since its launch, acrylic Frost with its cool calm pastel colours has been hot property in point of sale, retail design and home style.

But now acrylic Frost is really turning up the heat, with the addition of 5 hot new colours to the range.

Chilli, a new hot red, *Citrus* a fresh vibrant yellow, and *Mandarin* a warm spicy orange, combine to make a bold bright colour statement.

Sapphire, a deep rich blue and *Emerald* an intense vivid green add a jewel-like richness to the collection.

Created with today's bold, confident designs in mind, these new colours add yet another dimension to our photo/poster frame displays.

The original colours in the range, *Crystal* clear, *Polar* white, *Glacier* green and *Arctic* blue plus the incredibly popular *Lemon Sorbet*, *Blush* pink, and *Aurora* violet remain favourites with customers looking for a subtle, more relaxed look.

But if it's a strong, dramatic statement that you want to make, then the new acrylic Frost colours are definitely for you.

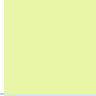

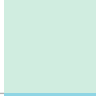

Whichever you choose, you can be confident in the exceptional acrylic product performance characteristics of strength, durability and quality and sure that whether in corporate imaging, in the home or retail displays, we can deliver fantastic quality at cost effective prices.

These hot new colours from DISPLAYS **N** FRAMES offer our customers even more choice and freedom to inspire their creativity- now that really is something to get heated up about!
